

KERALASE TREATMENT PRE- AND POST-TREATMENT PATIENT INSTRUCTIONS

- Wash your hair with shampoo (*no conditioner!*) the night before the treatment. Hair must be clean and free of hair products at the time of treatment.
- You must remain out of the sun or use sun protection (SPF sunscreen or hat) as much as possible for a week before and after each treatment.
- Once the hair and scalp dry naturally, you may resume normal activities including the application of hair products.
- Avoid washing your hair for 24 hours after the treatment, to allow the product to fully penetrate.
- After the treatment you may notice that hairs in the telogen phase (resting phase) may be shed by any slight trauma due to the laser treatment. This does not always occur, but please do not be alarmed if it occurs.
- You may resume using products and treatments as directed by your doctor.
